EDUCATION

STI College Global City
BS Information Technology
4th Year, Section BSIT-A705
2023 – Present

SKILLS

- C#, Kotlin, Python
- WinForms
- Android Studio
- Firebase
- Git / GitHub
- PC hardware diagnostics
- Technical support

CERTIFICATIONS

- SAP Basic Certification — STI College

OBJECTIVE

Fourth-year Information Technology student building practical experience as a full stack developer through freelance consulting and hands-on school projects spanning desktop, mobile, and web platforms. Looking to apply strong problem-solving skills to an entry-level development role or internship.

EXPERIENCE

Freelance Computer Consultant — Self-employed *2018 – Present*

- Provide independent computer troubleshooting and technical support, covering hardware diagnostics, driver installation, and system repair for clients.
- Resolve OS-level issues such as boot loops and driver conflicts, and advise on PC builds and component upgrades.
- Support clients with software and connectivity setup, including streaming tools and remote-access configuration.

PROJECTS

RavNihon — Japanese Language Learning App *School Project*

- Built a desktop application in C# (WinForms) to help users learn Japanese vocabulary and grammar.
- Developed a companion Android mobile version ("Ravy2") in Android Studio, extending the learning experience to mobile.
- Collaborated with a project team and managed version control on GitHub.

SafeSpot — Community Safety App *School Project*

- Developed an Android application in Kotlin with Firebase as the backend for real-time data and authentication.
- Designed features to help users report and view community safety information.
- Worked as part of a group to deliver the app as a course requirement.

TECHNICAL INTERESTS

- Explored WinSock Packet Editor (WPE) in depth, including DLL injection mechanisms and packet interception, as self-directed learning in low-level networking concepts.
- Hands-on experience with streaming and broadcast tooling (OBS) alongside general PC hardware diagnostics and system-level troubleshooting.
